

## **METHOD FOR PRINTING IN NORMAL AND BORDERLESS PRINTING MODES**

### **ABSTRACT**

One step of the method includes automatically selecting a normal  
5 printing mode for printing the image on the sheet when the image can fit within a  
maximum printable area of the sheet for the normal printing mode, wherein the  
maximum printable area leaves an unprintable margin from at least one edge of the  
sheet. Another step includes automatically selecting a borderless printing mode for  
printing the image on the sheet when the image cannot fit within the maximum printable  
10 area, wherein the borderless printing mode leaves no unprintable margin from the at-  
least-one edge of the sheet. Such steps are performed by at least one computer program.
